

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The primary conversion mechanism on this site is the coverage check funnel, but it is being diluted by competing CTAs, duplicate forms, and premature pricing display, causing users to hesitate or abandon before qualification.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Value proposition fragmented Three competing h1 messages dilute the value proposition above the fold.	Medium	Medium	6/10
2	Qualification language vague CTAs ask to check coverage but do not explain what qualification means, leaving visitors uncertain.	Medium	Medium	6/10
3	Competing CTAs split funnel Multiple competing CTAs fragment the primary path, creating ambiguity about which action advances the user.	Urgent	Low	5/10
4	Duplicate forms create ambiguity Two identical CONTINUE forms on the same page create ambiguity about the intended next step.	Urgent	Medium	5/10
5	Pricing shown before qualification Prices displayed before coverage qualification cause users to self-select out based on sticker price.	High	Medium	5/10
6	Pricing ambiguity near form Conflicting price points and fees near the CONTINUE form create uncertainty about commitment.	Medium	Medium	5/10
7	Repeated identical headings Identical h1 headings across pages provide no distinct navigation cues.	Medium	Low	5/10
8	Conflicting page titles The page title misleads visitors about content, breaking navigation scent.	High	Medium	4/10
9	Guarantee claims lack backing The 'SHOP WITH CONFIDENCE' claim lacks visible guarantee details, undermining trust.	Medium	Low	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
